Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/11/03 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claim 14, it has not been adequately disclosed that the sealed edges are perpendicular to the zipper. The disclosure does support the perpendicular relationship. The fact that one of ordinary skill in the art would make the seals perpendicular to the zipper does not provide support for the claim. This is a new matter rejection. The remaining claim is included since they stem from rejected claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over May et al (5,660,479) in view of Uramoto (RE 33,674). Regarding claim 14, May et al teaches the claimed structure but does not teach the sealed edges or the lap or fin seal being perpendicular to the zipper. Uramoto as seen in Figs. 2-5, teaches a similar bag with a zipper with sealed edges where the seals are a lap seal and are perpendicular to the zipper. It would have been obvious to employ the perpendicular side seals of Uramoto in the bag of May et al to provide a way to close the ends of the bag.

Response to Arguments

Applicant's arguments with respect to claims 14 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
